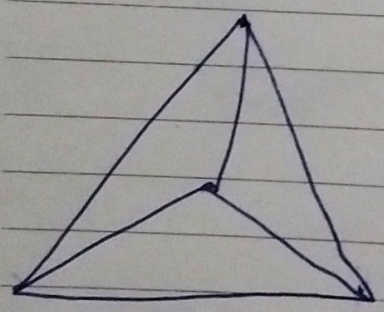
If everyone is moving forward together, with co-operation then success takes care of itself.

Tetrahedral Theory

Truthian Given (London)
(1875)

→ Based on a common characteristics of a tetrahedron.

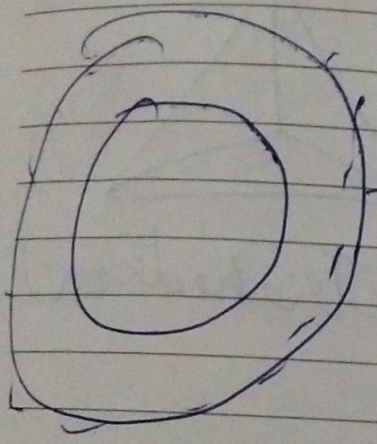
→ A tetrahedron is having four apex & four face.



Acc. to him

→ Earth during its origin, was a very hot sphere. But due to loss of heat, it gradually began to cool.

→ Firstly, the outer part of earth cooled down, forming crust. But inner parts of the earth continued to cool down & contract

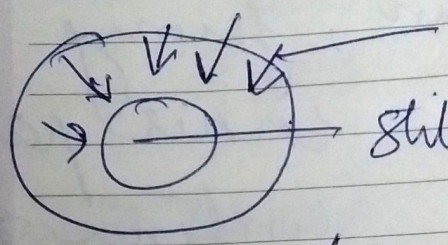


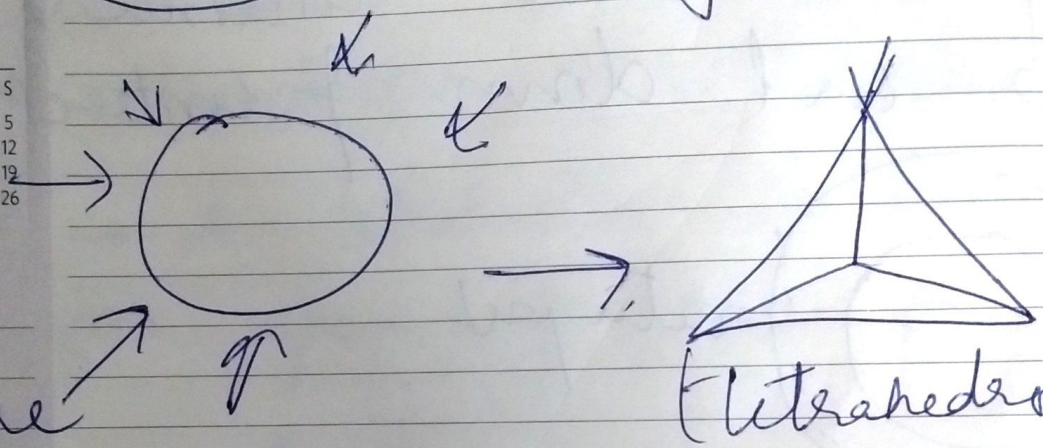
→ Consequently, already solidified the upper crust, which could not subject to further contraction, a large of its part collapsed in the inner portion & ultimately the earth began to assume the shape of

Some men just dream of worthy achievements, while others stay awake and work to achieve them.

Note →

tetrahedron.





after Uniform pressure

→ Acc to him → Earth cannot be in shape of real tetrahedron because of its structural variation.

eg. Mountain, plain etc.

Teamwork divides th task and multiplies the success among the team-members.

Cause of selecting Tetrahedron Shape

⇓

Observation

1. Antipodal arrangement of continents & oceans.

→ In a tetrahedron, a plane free face always remain opposite to open. Acc. to Green, oceans were created on a terrestial plane face of tetrahedron whereas the open became the continental mass.

(2) Triangular Shape of continental & oceans.

A positive attitude is not a destination. It is a way of life, it is the fuel of progress and growth.

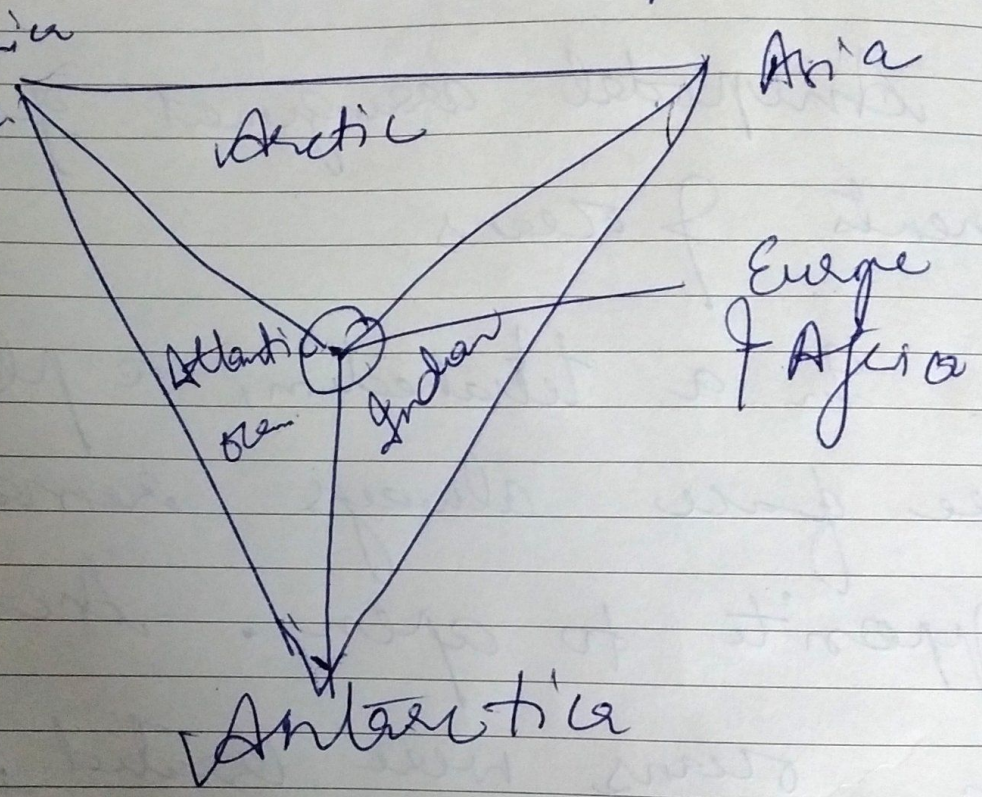
③ Dominance of landmass in N. Hemisphere & water in Southern Hemisphere.



Evaluation :-

→ Successfully explain the characteristics & distribution pattern of present day distribution of continents

Unless commitment is made, there are only promises and hopes, but no plans and ideas to execute.

of oceans. (Earth rotating speed) 400 meter/sec.

→ But fail to explain Drifting of continents & oceans.

→ This theory is based on rotating sapen which cannot be possible.

→ Rotating sphere Earth cannot be converted into tetrahedron.
